Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Regarding claim 1, the prior art does not teach or render obvious a locking lever disposed to the body in an arrangement with the body-side engaging part and cover lifting part for sliding and swinging the locking lever in a given sequence in response to movement of the manual operating member such that the locking lever slides in response to movement of the manual operating member to a first operating position from a locked position in which the body-side engaging part engages the cover-side engaging part wherein when the manual operating member is moved to the first operating position the locking lever is retracted a specific distance to a control position and the cover is unlocked.

Regarding claim 13, the prior art does not teach or render obvious a locking lever in an arrangement with the body-side engaging part and cover lifting part for sliding and swinging in a given sequence in response to movement of the manual operating member such that the locking lever slides in response to movement of the manual operating member to a first operating position for retracting the locking lever a specific distance from the locked position and for disengaging the cover from the case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
